Key Terms

Adjusted Gross Income (AGI): The taxpayer's total adjusted gross income (AGI) is the amount that is used to compute some limitations, such as the medical and dental deduction on Schedule A and the credit for child and dependent care expenses.

Child and Dependent Care Credit: A nonrefundable credit that allows taxpayers to claim a credit for paying someone to care for their qualifying dependents under the age of 13 or spouses or dependents who are unable to care for themselves. The credit ranges from 20% to 35% of the taxpayer's expenses.

Earned Income: Includes wages, salaries, tips, and other employee compensation. Earned income also includes net earnings from self-employment and other income received for personal services.

Nonrefundable Credit: A nonrefundable credit can only reduce the tax liability to zero. Any excess credit is not refunded to the taxpayer.

Qualifying Child: To be identified as a qualifying child, a person must meet certain basic tests. In addition, there may be other requirements to claim various tax benefits for that qualifying child.

Qualifying Relative: To be identified as a qualifying relative, a person must meet seven tests: Member of household or relationship test, Qualifying child of another taxpayer test, Citizen or resident test, Gross income test, Support test, Joint return test, and Dependent taxpayer test.

TANF: Temporary Assistance for Needy Families (previously known as AFDC), a state benefit also known as welfare.
